KANTIC MASK

Alchimie Forever's Kantic Mask will be introduced to the US market this fall. Based on iron chelators present in blueberries, this mask has been used in Switzerland at Forever Laser Institut for the past four years. "Blueberries," explains Dr. Barbara Polla, "help prevent the formation of free radicals. Blueberries are also vascular protectants, and are thus ideal to calm rosacea-prone skin."

This product is an ideal complement to the two Alchimie Forever daily moisturizers, Yttrium and Kantic, which also contain blueberries.
